Homemade in a Hurry — Side Dishes
Classic recipes and homemade quality – no compromises with this side dish made from the best ingredients so that you are happy to call them “your own!”

Store in the freezer upon arrival unless used immediately (1-2 days in the refrigerator).
Keep frozen for up to 12 months.

Cooking Oven Baked Mac & Cheese
Heat to an internal temperature of 165° F before serving.

Conventional Oven: Preheat the oven to 350°F. Remove the cardboard sleeve and lift the corner of the plastic film to the vent. Place the tray on a baking sheet in the middle rack position of the oven.

- From Frozen: Heat for 40-45 minutes.
- From Refrigerated: Heat for 25-30 minutes.

Microwave Oven: Remove the cardboard sleeve and pull up a corner of the plastic film to vent. Place the tray on a plate. After heating, allow to stand in microwave for 2 minutes.

- From Frozen: Heat for 10 minutes, turn the tray, and heat for an additional 3-5 minutes.
- From Refrigerated: Heat for 4 minutes, turn the tray, and heat for an additional 2-3 minutes.
